

Introduction

Now that we created our content with Quarto, it's time to publish it, i.e. make it accessible to the world !

What is Github Pages ? It's a service to host your content online.

Create a repository named after your GitHub pseudonym.

Push your Quarto project on it. Render it in a subdirectory "docs".

Go to your repository, go to the settings, and activate your github page. Select the "docs" folder.

It's online. Enjoy your portfolio.
