

Introduction

What is Quarto ?

How does it work ?

Installation

First step : Install Quarto.

Create a Quarto project

Now it is time to create a Quarto project in our directory. We choose "website", etc.

Now, we have yml and qmd files. What are they exactly ? qmd files are quarto files that are going to be the content of you webpage. yml files are the configuration files, we are only going to modify them partially.

How does it look ? Use quarto preview and quarto render commands.

How to change the content : - Use of Markdown - Create other qmd pages

How to change the appearance via configuration : - Navbar -
Template
